

The background of the entire page is a photograph of a large, modern energy storage facility. The facility consists of several tall, white, perforated metal cabinets or racks. One of the cabinets on the right has a logo that says "ENERGY STORAGE" with a stylized lightning bolt icon. The sky is blue with some white clouds, and the ground in the foreground is a dark, gravelly surface. There are two large yellow rectangular blocks, one at the top and one at the bottom, which serve as design elements.

EAST SETAUKET ENERGY STORAGE

Reliable Energy Storage for a Sustainable Tomorrow

East Setauket Energy Storage is a proposed 373 MW, four-hour, battery energy storage facility within the unincorporated hamlet of Port Jefferson Station in the Town of Brookhaven, that will bring many positive impacts to the local economy and community. The Facility will store electricity that will be dispatched to LIPA's local electric grid during peak demand hours or during emergency outages and will be able to power the equivalent of approximately 70,600 New York homes. We look forward to working in partnership with Town and County officials, local residents, and business owners on the development of this clean energy project.

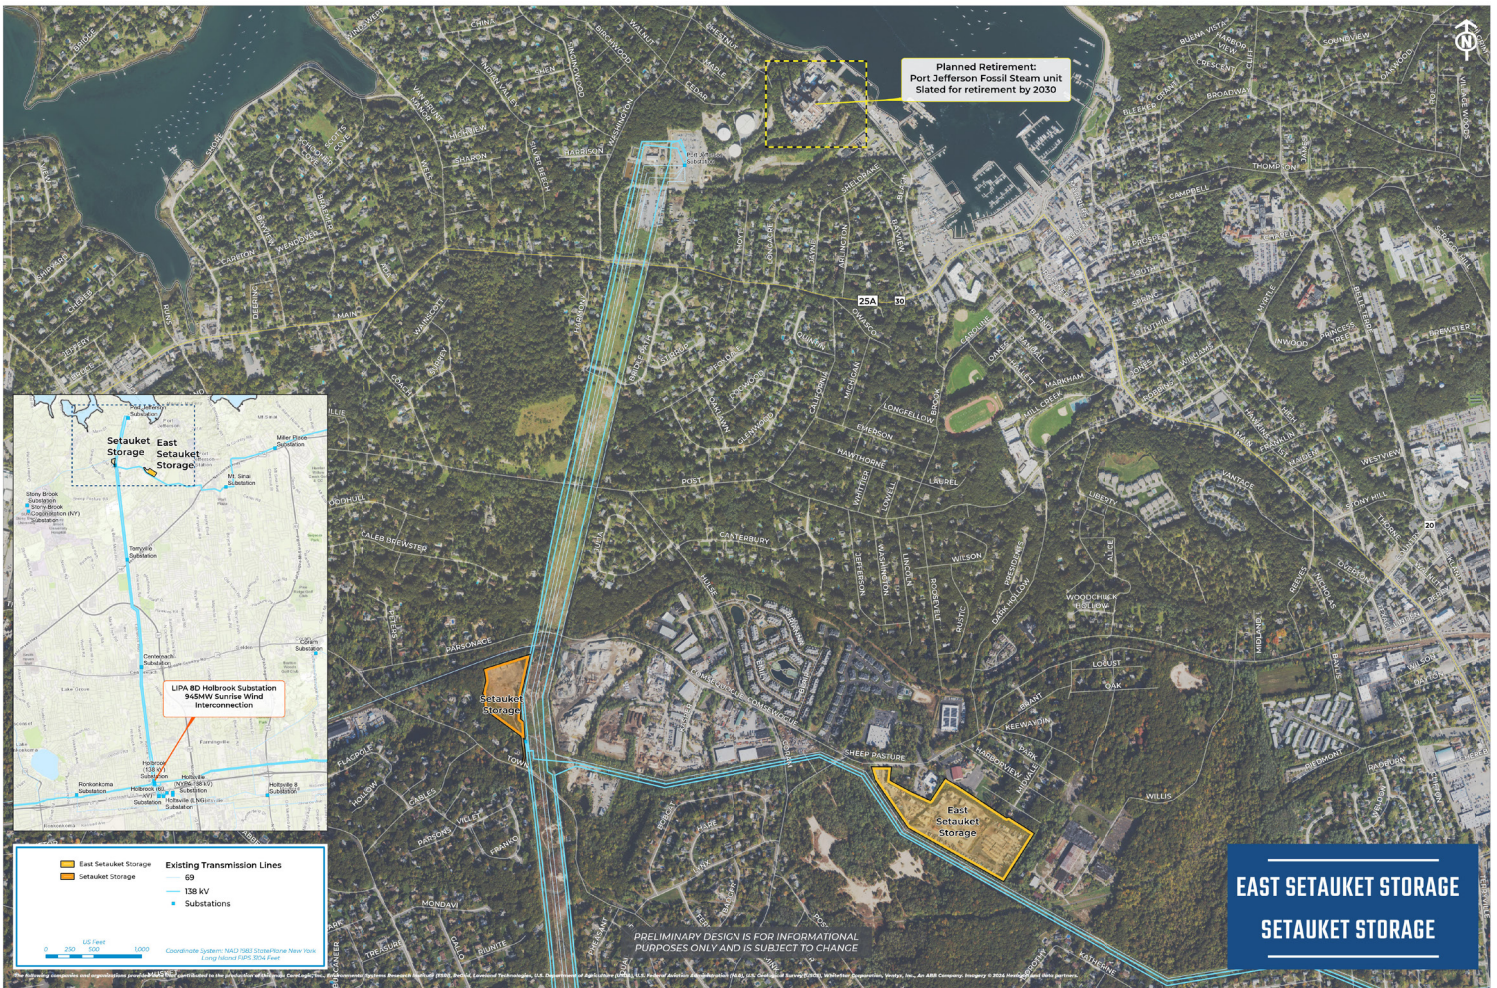

EAST SETAUKET ENERGY STORAGE

The Benefits of Energy Storage in the Town of Brookhaven:

- Provides new streams of tax revenue, helping to fund local public schools and infrastructure
- Delivers clean, reliable energy while lowering emissions and improving air quality
- Creates long-term grid resiliency and electricity reliability, reducing outages and their duration
- Makes a great neighbor with clean, quiet, and safe operations, and no strain on local infrastructure

About Savion

Savion, a Shell Group portfolio company with a growing portfolio of more than 43.3 GW, is one of the largest, most technologically advanced utility-scale solar and energy storage project development companies in the U.S. Visit www.savionenergy.com.
